Technical conformity of RGDAT-A70 Global Standard

Dear Sir,  
in compliance with Enel Global Standard GSCG002, we hereby inform you that the Technical Conformity Assessment (TCA) process for RGDAT-A70 Global Standard produced in your factory in (*Segni RM, Italy*) **has been successfully completed** according to the requirements of Enel technical specifications listed below:

Technical Specification	Revision	Date of issue
GSTP001	01	10/02/2016

The identification codes of the equipment(s) subject of this TCA , are listed in the table below:

EnelType code	Enel Material code	Supplier's code
DY1059-A70/C	160001	RGDAT-A70/C

**Description**

Rilevatore di guasto direzionale e di assenza tensione - linee in cavo

The technical assessment and approval of the above listed equipment(s) has been realized with reference to the TCA report:

PGP-LDD628 rev. A issued il 08/11/2016 and authenticated by the Enel 21/12/2016

We hereby remind you that all the product documentation, according to the procedure described in the Enel Global Standard GSG002, must be held in your factory and showed on demand of our representatives.

The components you will supply shall comply with the product documentation, otherwise the conformity will be withdrawn. Furthermore, any modification of the products shall be approved by us in advance. In such case, according to Enel Global Standard GSG002, a new Technical Conformity Assessment

process shall be requested.

For any communication or information about this TCA please refer to:
